

Imtiaz Royhan

React Native & Next.js Developer · Remote-Ready

imtiaz.axi@gmail.com | +880 1607 574959 | Chittagong, Bangladesh | axistro.dev

About Me

Mobile and full-stack developer specializing in React Native and Next.js, with hands-on professional experience shipping production features at an Australian startup. Founder of Amplytic, a mobile app development studio. Comfortable working asynchronously across time zones. Seeking a remote junior/mid role where I can grow long-term.

EXPERIENCE

Founder · Amplytic

May 2026 – Present

Remote · Mobile App developer

- Founded Amplytic, an open-source believing team and development studio focused on ensuring universal access to high-quality, production-ready software.
- Leading end-to-end product development — from concept and design to deployment — using React Native and Expo.

Mobile App Developer Intern · FocusBear

Nov 2025 – Jan 2026

Mount Waverley, VIC, Australia — Remote

- Shipped production-ready productivity features in React Native for a live consumer app used by real users across Australia.
- Cut perceived UI lag by optimizing re-render cycles through strategic memoization and state restructuring.
- Collaborated daily with a cross-functional team (design + engineering) using async-first workflows across time zones.
- Delivered features end-to-end: from design handoff in Figma to tested, merged code within sprint cycles.

PROJECTS

Open Claude — Open source alternative to Claude's workspace

2026

Remix · vite

- Virtual Workspace in your browser. Sandbox any js framework project in your browser without any setup.
- Complete workspace with every tool that Claude uses with any LLM of your choice.

DrawSync — Realtime drawing collaboration

2026

Dotnet · Appwrite

- Implemented real-time drawing interactions (live updates, instant state sync) using SignalR's realtime subscriptions.
- Built full-stack: authentication, database schema, and a responsive dashboard.

Appwrite Native — Mobile Client

2026

React Native · Appwrite

- Built the unofficial mobile client enabling developers to manage [Appwrite](#) projects on the go — filling a gap the official platform doesn't cover.
- Designed a mobile-first UX that reduces common backend management tasks from multiple steps to single taps.

Bridge Marketing — Digital Marketing Company

2026

Next.js · GSAP · Framer Motion

- Designed and built a high-converting marketing page with animation-driven engagement, fully optimized for SEO and Core Web Vitals.

ClassRep — Classroom Management System

2025

Next.js · Appwrite

- Implemented real-time student-teacher interactions (live updates, instant state sync) using Appwrite's realtime subscriptions.
- Built full-stack: authentication, database schema, and a responsive dashboard — deployed end to end.

TravX — Local Routing Application

2025

React Native · Appwrite · MapTiler · OSM

- Developed a routing app with a custom pathfinding algorithm, live map rendering, and local fare data — solving real transport navigation gaps.

PRIM — GitHub PR Assistant

2025

React Native · Appwrite

- Developed a toolset for documenting, reviewing, and improving GitHub pull requests — improving code review quality and speed.

Crimson — Blood Donation Platform

2024

React Native · Appwrite

- Built a mobile platform connecting blood donors with recipients, with smart donor matching based on blood type and location proximity.

SKILLS

Languages	JavaScript, C, C++, Java, SQL, C#
Mobile	React Native, Expo
Frontend	Next.js, React, TailwindCSS, GSAP, Framer Motion, NativeWind, Reanimated
Backend	Node.js, .Net
Database	MongoDB, MySQL, Appwrite
Tools	Figma, MapTiler, OSM, Git, GitHub

EDUCATION

B.Sc. in Computer Science · International Islamic University Chittagong

Aug 2023 – Present

Chittagong, Bangladesh
